

Please refer to PHT T-ITX-5/6 manuals.

Attention:

Our chassis are built with very small gaps between front, top and back, so please be careful when removing and reinstalling top panel. To avoid scratches, please loose four marked screws BEFORE removing top panel.

Now, when back panel is loose, you can remove and reinstall top panel without making any scratches. After your assembly is finished, please tighten all four screws gently.

Before you install HDD (or HDDs), please stick supplied rubber rings to the floor around opening for screws mounting HDD on posts to the floor. When you install HDD, please tighten all four screws gently.
